large spring, thence a direct line to said creek to Cumberland river, thence up Cumberland river to the mouth of Livingston creek, thence hereby made and erected into a county, known and called by the name of Crittenden.

This act also appointed the followplace, not exceeding two and one of the county: Thos. J. Flournoy, of Caldwell county; Fredrick D. N. Lewis, of Hickman county; Robert is now known as Crittenden county, now be seen a few ancient locust James Gholson, of Christian county. These gentlemen met on the first Monday in April 1842, at the house of James Cruce, and after some deliberation, the present site of Marion was agreed upon as the place for the capital of the new county, which had been named in honor of United States Senator John J. Crittenden. At this time the only house n Marion was that of Dr. John S. Gilliam which was a double log strucure, that stood in the center of town destroyed by fire.

#### AGRICULTURAL

RESOURCES, 'Accuse not nature, she has done her

Do thou but thine."

The development of the county has been gradual; every year since its formation, the forests have given away to the woodman's ax, new homes have been reared, the little clearings have broadened into wide cres and extensive farms, the little cabins have tumbled down, while substantial houses and pretty residences speak in louder tones than printers ink of material progress.

Crittenden is pre-eminently an agricultural county, and its resources even in this respect are yet undeveloped, comparatively speaking. The soil is generally productive, and has paid well those who have tilled it with good judgement. It produces abundantly tobacco, corn, wheat, oats, rye, vegetables, all kinds of fruits such as apples, peaches, pears, plums and the smaller fruits such as berries grow to perfection. Millions of pounds of tobacco are shipped from the county annually, and the new stemmeries and barns that are annually being erected at the ship ping points and on the farms tell that the weed will have its producers in the county for many years to able sinvestment, along the vast amount of money into the coun- to be one of the county's

Tolu is a remarkable little city in one respect. Not a drop of liquor was ever sold there, When the town was founded about fifty years ago. the lots were sold with the provision that no liquor should be sold on them: and notwithstanding the city limits have been greatly enlarged since then, the later purchasers have sacredly observe 1 the original com

The coking overs at the Barnaby mines will be really for operation by the first of the month. For years the coal at these mines has been recognized as the best in Southern Kentucky. This mine gets its name from an old Englishman, who sometime in the decide beginning with 1880 was attracted by the superior grade of enal, and began working it. It then had a wide local reputation, being sought after by the blacksmiths for miles. "Kit and Jack's coal, as it was then called, was hauled on road wagons to Marion, when this place was a village some forty years ago.

The old brick graded school house, which was sold to the colored school district yesterday, was built in 1894, and from an old copy of the Press found under a corner stone we learn that its building was a great event in the town then; and the fight to vote \$8,000 to build it wis long and lively. Really our forefathers of 1894 must have been pretty close-fisted fellows. If they were to see our public school buildings scattered over the city now, or gaze on the magnificent proportions of either of our two handsome college buildings in the lovely suburbs three miles from the court house, they would be astonishe l,

street, at the corner of Maxwell avenue, occupied by the Yangell Dry Goods Co., was struck by lightning last evening. The once subtle fluid was promptly caged in the huge reservoir and will be served to the clerks as a ten o'clock lunch this morning, as a stimulant while the thunderbolt is being put up in smill pickages, and will be given to the boys for the 4th of July celebration. So in his work since leaving then married Miss Lalina Phillips the school. He is deserving, one of having married and left him, he ple generally.

P. C. BARNETT.

P. C. Barnett is one of Crittenden's many honored and revered old men. He was born in Warren county Feb 16 1809. His grand father was soldier in the Revolution and fought

in a North Carolina company. P. C. Barnett went with his father to Miss ouri and remained until he was severteen years old he then returned to Warren county and a little later went to Cumberland college at Princetor. In 1335 he came to this county and settled on his farm where he has lived ever since, giving most of his time and attention to farming. From 1851 to 1871 he was engaged in merchandising to some extent, and buying and re handling tobacco, In 1834 he wa married to Miss Jeanetta Threlkeld, who died in 1875. Mr. Barnett has four children living. James C. Thomas T., Sallie Miles and Wm The three sons have grown prominent and are numbered among the best sterling qualities that go to form the citizen and the patriot. Mr. Bar nett's eighty-five years, have crested his looks with the frosts, and plowed furrows in his temples, but behind them is a cherry old age, that silently utters the thought of Lytton when he said: "It is a pleasure to grow old his energies for a long time, and it cial circles of Marion. when the years that bring decay to ourselves ripen the prosperity of our country." The spirit of youth seems to stay with Mr, Barnett; he delights hale and hearty old age that comes so slowly in our beloved county is a compliment to our surroundings, and a priceless tribute to our climate. Surely Wordswerth thought of such a co inry and knew such men when he said: "But an old age serene and bright, And lovely as a Lapland night, hall lead thee to thy grave,

Drainage is ample, as may be een

EOLOGICAL FORMATIONS, SOILS AND

The geologically lowest or oldest is the St. Louis limestone of the sub carniferous system. The limestone itself is but rarely seen, and only at ver in the vicinity of Dycusburg and and of various shades of blue. The beds at Dycusburg are fine grained magnesian limestone, and would no doubt make good hydraulic cement.

The regions of the county that are underlaid by this group of limestones (marked A on the map) are distinguished by an abundance of chert or flint blocks, which have remained as a residue after the disintegration of the limestone. The soil covering this chert debris is rarely deep, but very rapidly on it, and when sufficient care is exercised to prevent its washing, it maintains its rank as one of the best soils of the State for a long time.

there is another series of limestones, perly, I have no doubt that most every to which I have applied the name of Princeton group. They have a thickness in the county of about 200 feet, and the spaces where they are at the they contain. They will be discussed acres, surface are marked "B" on the map. The lower 150 feet consists mainly of generally above the average, while manufactured from the soft Chester and the coal. At the top of the coal ores not only of first-class quality but ken as a whole, is decidedly hilly. while most of the beds could be turned Much of this unevenness is the result into lime of superior quality. I have informathe tion besides of other bodies in this vicinity which I did not find time to visit. Enough was seen however to convince me that this district could insure a steady supply of ore to a large furnace for at least fifty years.

> LEAD, ZINC AND SPAR. It may be stated with

contradiction that Crittenden county contains more deposits of lead, zinc, flour spar and barite than any other section of the State. Most of these have been known for many years and only a few are to be regarded as recent discoveries. None of them, excepting perhaps the Columbia mines, have ever been worked with even a semblance of mining capital to back them. Of course many shafts were sunk where there was absolutely no chance for success. Nor are the usual stories of deposits of gold and silver wanting. Any well informed man must however know that gold is not to be found in this region. Nor need silver be looked for save as a very minute per cent. in the galena. Still, Crittenden has many mineral deposits that ought to prove valuable.

It has been claimed that the lead

deposits of Crittenden segregations filling cavities in the limestone. This claim scarcely deserves serious refutation, since but little geological knowledge is required to enable one to determine that the county is crossed by numerous faults, and that the lead deposits invariably occur in the line of the fractures. They are therefore in true fissure veins, the origin of which was in no way dependent upon shrinkage of the strata nor to the eroding or eavity-making effects of water upon the limestone. On the contrary these fissures are of deep seated origin, having resulted from convulsive movements of the earth's crust, whereby it was fractured and the country for some distance on one side of the dislocation either shoved up or thrown down. The down throw is several instances in the county cannot have been much less than one thousand feet, and only in a few cases among the twenty or more "faults" that I have determined was it less than two hundred feet.

The deep scated origin of these fissures was suspected : leady by he plencer geo'egist, David Dale )wen, who was State geologist in the latter '50's. His comparison with he Devonshire lead deposits was nearer the truth than he knew. The comparison scemed to fail in one important point, In Devonshire, namely, the metalliferous fissures are associated with trap dikes, or rocks of igneous origin, and until lately nothing of that kind had been known here. My investigations. however, have developed the fact that such dikes do occur in Crittenden county. A point on one of these where a shaft nearly fifty feet deep has been sunk, is locally well-known as the "Flanary silver mine." Much scientific interest attaches to this discovery, but beyond the mere determination of the existence of igneous rocks in this field, they have no economic value. In my report to the survey I discussed, at length the questions re'ating to the source of the lead and other minerals in Comparing the above analyses we these veins, the horizons at which the greatest deposits may be expected and the depth to which they extend. It is neither necessary nor desirable to go over all that here. A mere statement of my conclusions will

## MARION'S ENTERPRISING BUSINESS MEN.

H. K. WOODS.

In every city there is at least on firm conspicuous in its line, which by reason of its fine reputation, the superior quality of its goods, and the high social and business standing of its proprietor overshadows others. In Marion such a position is occupied by H. K. Woods, whose headquarters are handsomely and conveniently fitted up with all the appliances necessary to carry on his large and flourishing trade. Mr. Woods was raised in this county, has had twelve years experience in the drug business; until the last year he was a member of the firm of Hillyard & Woods, but has now bought the entire stock. With such an honorable business man at the head, the house is sure to succeed. He is an accurate, scientific and conscientious druggist and chemist, who i building up a large trade, a solid business and a well merited popularity. The profession of a drugg st is one above all others requiring strict and careful preparation, an accurate know ledge of all the many and varied poisonous and non-poisonous prepara ions used in pharmacopia, and a power of concentrating the mind on the busithing of minor importance. These are the requirements of a good druggist, and of these Marion has her ful share. Among these we will, with general consent, place H. K. Woods in the lead, for he has won an enviable position in the business fraternity. He carries a very large and complete stock of drugs, drug sundries, patent medicines, perfumes, books, stationery paints, oils, and not the least comprehensiye is the large stock of wall paper. The stock is replete with all articles that naturally come in this line, and these selected with the ut most care, as Mr. Woods studies the wants of the people and does well his part in supp'ying a'l that can be kent by any first-class drug house. He makes special sales to the physicians in tributary towns, selling them their drugs for their dispensation, and also does a limited wholesale business, but this branch is on the increase. The whol, stock is bought as low as expe rience and ready money can buy goods and will be sold as low as possible. Both stories of the building, 20x90 in size, are filled with goods, the lower being the display and salesroom while the upper is filled with heavy and bulk goods. The main store room is beautifully finished with cherry wood furniture, cabinets and prescription cases and thus his store room is one of the finest in the city, and his stock meets every demand of the trade. Every prescription placed on his prescription case will be compounded promptly any hour of the day or night by a man whose ability is unquestioned, and from a stock of drugs that bears the closest inspection. This house is one of the leading contributors to the commercial progress of the city, and its large and increasing business constitutes a prominent feature of the general trade.

perfect did we fail to make mention of anything being on hands long, so they this well established retail house.

very beginning. The store room is) 20x90, well arranged throughout, and divided into its necessary departments for a complete stock of dry goods, Iress goods, notions, hats, caps, I dies and gents furnishing goods, trunks, valisces, boots and shoes, not wanting in any particular, for it is his inten tion to keep just what is wanted by his customers, and deems nothing to good for their trade; and patrons realize the fact, knowing they always have good assoriment to select rom, and get goods as cheap as they can be o ained anywhere. Mr. Haynes is possessed of fine business qualifications and his manner of doing business has won him many friends. He carries an \$8,000 stock of goods, which was bought at prices far below what such goods usually bring, at the same time buying fashionable and seasonable goods He now offers the entire stock on the same basis he bought them, so his goods are necessarily sold cheap and cash customers will be greatly surprised at the bargains now offered at the house of R. F. Haynes. These prices are in no one department but extend through the entire stock and assures us that now is the time to buy summer goods. The business is carried on in systematic order, which to be fully appreciated must be seen in the full tide of business. Nothing helps a town so much as for each of its business men to determine to make his business one of great value to the purchaser, a credit to the town, and an honor to its builder, and in this the business of Mr. Havnes is a decided success, and he has made himself a epresentative business man, one that Marion is pleased to number among her citizens. His efforts are always directed with studied certainty, and his close attention to business enables him to compete successfully with similar establishments. In buying he exercises good judgment, selecting only such as afford him ready sales, hence a small margin gives him a fair profit, and his interest is to secure a large trade. The magnitude of his operations places him in the van, and he will proceed with the march of the

business at Marion. He is too well known to admit of an introduction. nd his business has grown from its

#### THOMAS BROS.

Among the industries most essential

wasty to sawy, and in a short 'ime was teaching school.

In 1879 he entered the Medical College at Louisville, and in 1882 he graduated. He practiced medicine for a few years, achieving success both as a physician and surgeor. Tout this time his father's health began to fail, and the young doctor was asked to take charge of the large business interests that had been bui t up by the father. The young man took hold of these affairs and in devoting himself to them, necessarily curtailed his practice. Finally he and his brother formed a partnership and conducted a large mercantile business at what is now known a Mattoon. Later he moved to Marion and took a position in Marion Bank as assistant cashier, and was later

to see him nominated and elected THOS. J. YANDELL, JR, which position he still holds. railroad commissioner, knowing that he would fill the place with credit to himself and bring honor to the good county that gave him birth.

#### A. S. HARD.

Is a resident of Dycusburg and is the Republican nominee for jailer He was born in Crittenden county June 26, 1856, and like most of the other p op'e of Crittenden he was reared on a farm and brought up in the ways of the farmer. He was a son of Reuben C. Hard, who died when his five boys were small. At an early age A. S. Hard began teae ing in the public schools and proved to be a successful tea her. Later he clerked in J. ## GUM GROVE FARM.

#### A. H. CARDIN,

The proprietor of Gum Grove, and one of the leading farmers of Western Kentucky, was born near Richmond. Virginia, in 1836, and was brought up on a farm. He has always been devoted to farming and stock business. In 1845 he came to Kentucky and has since made this his home. About thirty years ago he began buying and wholesaling strips, and leaf tobacco, and that, added to his already extensive business and large operations have wonderfully increased its volume.

Gum Grove farm is a beautiful farm of twelve hundred acres, by nature adapted to stock raising, and every improvement in the way of building and fencing has been made that would add to its utility, so that it may well be considered one of the finest farms in Kentucky. It is not only a pride to the owner, but to the people of the county of Crittenden. When farming and stockraising are conducted carefully on scientific principles, such as are used by Mr. Cardin, it is of more value to the country than

A. H. Cardin

THE COURT OF CLAIMS.

Kenneth Bazemore had the good fortune to receive a small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy when three members of his family were taken with dysenterry. This one small bottle cured them all and he had some left, which he gave to Geo. W. Baker, a prominent merchant of the place. Lewiston N. C., and he cured him of the same complaint. When troubled with dysentory, diarrhoea, colic or cholera morbus, give this remedy a trial and you will be more than pleased with the result. The praise that naturally follows its introduction and use has made it very popular. 25 and 50 ct bottles for sale by Moore & Orme.

My boy was taken with a disease resembling bloody flux. The first thir I thought of was Chamberlain's Colie, Cholera and Diarrhoea Remedy Two doses of it settled the matter, and cured him sound and well, and I heartily recommend this remedy to all persons suffering from a like complaint. I will answer any inquiries regarding it when stamp is enclosed. I refer to any ecunty official as to my reliability. Wm. Roach, J. P., Prim roy, Campbell co., Tenn. For sale by Moore & Orme.
